

Frequently Asked Questions

1. Question: Where can I buy your products so that I may use on my personal vessel?

Answer: You can go to our "Links" page and find a retailer to purchase our products from.

2. Question: How do I install your product on my vessel?

Answer: You can go to our "How To" page and watch a video on "How to Install a Hatch".

3. Question: What is a deck seal?

Answer: Deck Seal is a gasket that is bonded to the bottom frame of the hatch that replaces the need for silicone.

4. Question: What do I need to do if I want to replace another manufacturers hatch with a Innovative Hatch?

Answer: First you want to measure and inspect all of the required areas of the mounting surface, cut-out requirements, interior liners, as well as other unseen obstacles such as plumbing and wiring. The great feature of the Innovative Hatch is the fact that our hatch has a larger opening than most of our competitors, so that if the out side dimensions are the same, all you would need to do is make a larger cut-out to accomodate our hatch.
